Product Overview

Introduction

We are proud to add the flexible and stylish Tilt-Turn W6400 (all-wood) to our product line. Popularized in Europe, the Tilt-Turn W6400 opens to the interior like a casement window when the handle is rotated 90 degrees, or tilts in slightly when the handle is rotated 180 degrees. The tilt position allows for gentle circulation during inclement weather, while the swing position allows for convenient cleaning and maximum airflow. Multiple lock points provide added stability and security, and the durable hardware allows for oversized applications. Our Tilt-Turn W6400 can be customized with screens, glazing options, and various hardware finishes.

Wood Species

Our standard wood species are the following:

The mark of
responsible forestry

- Pine
- Vertical Grain Douglas Fir
- African Mahogany

Alternative and exotic wood species are also available. See the Wood Species page in the General Info section.

Other Options

The Tilt-Turn W6400 can be purchased with additional options such as custom grille patterns, fixed exterior screen and brick or stucco exterior moulding.

Contact Pacific Architectural Millwork for additional options and customization.

Glazing Options

Standard glazing for the Tilt-Turn W6400 is 1" overall insulated glass.

Custom glazing and tinted glass are available.
